

Meeting Report

Date: April 3rd, 2024

Duration: 1h (on zoom)

Attendees

Asma Aimade

Apolline Leboucher

Kaoutar El Azzab

Mohamed Gueye

Baudelaire Tsoungui Nzodoumkouo

Agenda

- ☒ Checking the progress of the new feature
- ☒ Fixing bugs
- ☒ Updating the pipeline

Discussion Summary

Progress Evaluation:

The team diligently reviewed the feature's functionality, user interface, and integration with existing systems. This evaluation aimed to identify any potential issues or discrepancies and ensure that the feature aligned with the initial design and objectives. Through collaborative testing and feedback, the team confirmed that the feature was nearing completion and ready for deployment.

Bug Identification and Resolution:

During the progress evaluation, we also identified several bugs and issues that required attention. These ranged from minor glitches to more significant functionality concerns. Through systematic debugging and troubleshooting, the team prioritized and addressed each issue methodically.

Quality Assurance:

Once the bugs were fixed, the team conducted rigorous quality assurance testing to validate the effectiveness of the solutions implemented. This involved comprehensive testing scenarios to simulate real-world usage and verify the feature's performance under various conditions.
